## Abstract

Draw equally spaced points on a circle.

```
In[63]:= For[ i = 0; x = {},  
             i < 15,  
             ++i,  
             p = e2iπi/15;  
             x = Append[x, {Re[p], Im[p]}]]
```

```
In[64]:= ListPlot[x, AspectRatio → 1, PlotStyle → PointSize[0.02]]
```
